Neue Blickwinkel is available in digital-only format or as a digital-print bundle. The Learning Site, consisting of FlexText[®] and Explorer[®], can be accessed on any device.

Neue Blickwinkel

Proficiency-driven AP® German Language and Culture Program

Neue Blickwinkel provides a bespoke AP® experience that is as unique as you and your class.

► Choose your own adventure

Neue Blickwinkel offers ten comprehensive units, but was designed so that any six could be combined during a school year and still provide coverage of all AP® themes, modes of communication, and all seven AP® task types. This is so that educators can pick and choose content based on their personal preferences and expertise, what their learners studied in earlier levels, and learner interests. Authentic resources include the hallmark feature of *Neue* that learners love: a popular German film in every unit, with related tasks that make connections between language, history, the arts, and more.

► Strengthen Vocabulary & Grammar

Learners will build on their vocabulary repertoire and grammatical skills in context. *Vokabelarbeit* is pulled from authentic resources, and is practiced through communicative tasks. Grammar sections also revolve around language functions – real-life uses of the concepts that are being presented and modeled.

► Prepare for Assessments

Formative assessments in the form of speaking and writing tasks present opportunities to assess learner proficiency and comprehension, or they can be grouped together as an IPA at the conclusion of each unit. IPAs demonstrate learner skills in all three modes of communication via AP® style tasks that are thematically connected to unit goals.

AP® preparation includes 10 AP® tasks per unit. These resources include timed online free response exercises, resource-based multiple choice questions with immediate feedback, and scoring guidelines to support review.

Too many books
in your bag?

Teach German in class or on the go—with the Learning Site

The Learning Site is your home for two seamlessly integrated online learning tools, **FlexText®** and **Explorer®**! For extra mobility, download the Learning Site iOS App!

FlexText® is a digital textbook that page by page reflects the *Neue Blickwinkel* content. Highlight and take notes on pages that adjust to any screen, and that always remember where you left off the next time you log in. Learners can click their way from FlexText® pages directly to their video, audio, external links, and assignments in Explorer®.

Explorer® is more than a holding site for links, assignments, and assessments. An online classroom forum allows discussion, recording exchanges, and more. In *Mein Lernportfolio*, learners can link evidence of their progress in relation to Can-Do Statements and Unit Goals. Educators love their version of Explorer®, with customizable gradebook and assignment settings, proficiency-driven instruction strategies, and more.

The Learning Site can be integrated with most learning management systems, including Schoology, Clever, Google Classroom, and Canvas!
