Show/Hide Settings

The Show/Hide content tab on the Settings page allows teachers to control content visibility for students within the Explorer® Content page, Related Items view, and FlexText® compass icons. Please note that FlexText® pages cannot be hidden.

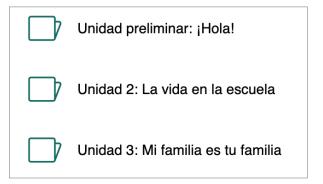

By default, all content is marked as visible. Select or deselect the **checkbox** next to a folder, subfolder, or resource to make it visible or hidden. Use the ➕ icon to expand a folder.

Hidden content will not be visible to students within the Explorer® Content page, Related Items view, and FlexText® compass icons. However, hidden content is still visible for teachers and will have hidden indicators on the Explorer® Content page. Hidden content can be accessed by students without making it visible if assigned using Learning Site® assigning functionality.
